→ Call ⇒
when someone   Call Me
Click dialup open

→ Mail :- <a href="mailto: priyansh70890 @
when click   gmail.com"> Mail Me
email open

→ Bookmark go to
                          id/class
  "Smooth this   element on which
     transition   we go
  <Style>
   html { scroll-behaviour: smooth; }
  </style>

＊ Div Tag

→ Division tag is generic tag used
   for text, image, link, basically it is
   a container.

If is
a block
Element   (div→)
                 (container)   header
                                    img
where as inline   feature
span is inline
Element

":- Inline element don't have Height
    and width if we give then it is
    not working, [for use give display]
                  [block / inline block]

* Semantic Tag:-

→ It is tags which provides
